

Your complete NXT dataset, structured for analytics.

Aqueduct Analytics

A secure data warehouse that delivers the full Raiser's Edge NXT dataset, so your team can build accurate dashboards and reports without manual exports or API constraints.

WHY AQUEDUCT

- **Connect all your data sources**
Bring together Raiser's Edge NXT, Financial Edge NXT, and other systems into a single, secure warehouse for unified analytics.
- **Analytics without API constraints**
Aqueduct delivers the full dataset, not just API extracts, so your dashboards stay comprehensive, current, and reliable.
- **Accelerate reporting**
Automated updates mean your team avoids manual data compilation and can focus on trends in fundraising, revenue, and engagement.
- **Use the BI tools you already love**
Leverage Power BI, Tableau, or any BI platform. No proprietary tools required. Your data, your tools.
- **AI-ready by design**
Integrates with Microsoft Fabric, enabling Power BI, Copilot, and AI-driven analytics without re-architecting your environment.

WHO IT'S FOR

Aqueduct Analytics is built for **advancement, finance, and operations** teams at nonprofits, higher-ed, and healthcare organizations using RENXT & FENXT that want a complete, accurate view of their data and the power to analyze it with familiar BI tools.

WHAT TEAMS ARE SAYING

"It used to take us eight hours to export our fundraising data, and we could only do it weekly... Now our data updates automatically, and leadership can pull up current numbers on their phone and see results as of that morning... Aqueduct has given us both greater efficiency and a holistic, granular view of our data."

BJ McHugh, Executive Director, Advancement Strategy & Operations
Willamette University

"Aqueduct gives us a stable, extensible foundation for data engineering and analytics. Our old ETL pipeline required a dozen scripts to ingest and structure data. Aqueduct eliminated that complexity. The table structure is logical and human-readable, which helped us quickly migrate legacy code and queries."

Seth Mercier, Director of Advancement Analytics
Colby College

WHY AQUEDUCT IS DIFFERENT

- 1 Comprehensive dataset**
Aqueduct delivers your full dataset, not just API extracts, so your reporting is comprehensive, accurate, and never limited by partial data pulls.
- 2 Your data stays yours**
We don't store or manage your data. Everything lives in your environment, giving you full control, security, and ownership at all times.
- 3 Built for your infrastructure**
Host Aqueduct wherever you prefer, cloud or on-premise. No forced architecture, no constraints, just a flexible foundation that fits your organization.
